

Commercial crimes and fidelity guarantee insurance

This is not just another webinar with theory, models and frameworks! This webinar draws on practical cases that Nolan has dealt with during his time in the risk insurance industry, and dealing with fidelity guarantee insurance.

Commercial crime is estimated to cost the South African economy billions of rands annually. Business is forced to protect themselves against this growing risk of direct financial loss as a result of theft and fraud, by investing in fidelity guarantee insurance. This course will cover: types of commercial crime; trends in the current economic environment; drivers of commercial crime; warning signs; insurance claims/policy triggers; protocols to give the claim the best chance of success; civil recovery and criminal case processes; and risk mitigation steps.
