

## SOFTWARE LAW

4 hours estimated learning time

Self-paced online course

### THE COURSE AT A GLANCE

**Several areas of law affect the creation and commercialisation of software.**

This self-paced online course explores those areas of the law that are most applicable, and will attempt to give guidelines on how to deal with common legal issues that arise in relation to software. Starting from intellectual property law, the course then covers various other topics such as open source software, escrow, and the practicalities of common agreements.

Sign up at any time and work at your own pace to learn more about the legal issues surrounding software!

|                                 |  |
